

"Attention, recruit! We've got an Echo Squad member on the deck!"

What's that, rookie, who is that? That earth-shaking mountain of muscle is none other than Mass.

Now listen up, because I'm only gonna say it once: I will tell you only what I'm permitted to tell you. The rest is classified..."

A veteran of the British SAS (Special Air Service), Mass is a formidable member of Echo Squad. Frustrated by the corporate corruption of British military forces, Mass' fate eventually turned him onto mercenary work for several organizations engineered by anti-corporate agendas. However, his past has left him with a promise to keep a secret--one that would put himself or his fellow Echo Squad companions in grave danger. Now he's targeted the Nogari Corporation for its crimes against humanity, vowing to destroy them with their own Ambrosia technology and recover the mysterious meteorite they so desperately wish to harness.

He certainly has the skills to, and he's a force to be reckoned with. A true power hitter with a tough hide, Mass's brute strength makes him a prime choice for weapon control and melee combat situations. His Ambrosia Suit allows him to generate a dynamic shield capable of breaching thick defenses, absorbing incoming fire and moving with him as he charges forward. And while it uses a fair amount of Ambrosia to perform, Mass's Static Shockwave is Echo Squad's best. Delivering a devastating blast of energy to surrounding enemies for a quick decimation, he rarely needs to use it twice.
